# SAINT LOUIS CHAPTER HISTORY

---

*Professional Recognition Committee*

---

## ACKNOWLEDGEMENTS

---

The St. Louis Chapter is rich in leadership and talent. This document is to serve as both a reminder to those that have lead and for those that are to lead. It is a document that should be updated annually after the Installation of new Chapter officers for the forthcoming year that is typically held during the spring. The document shall be controlled by the *Professional Recognition Committee* or at the pleasure of the current President.

Much of this document was as a result of notes and records graciously furnished by William Clarke, P.E. It was provided to me several years ago for the purpose of placing them into the Chapter Archives. The Department of Professional Recognition elected to create two distinct documents for recording the history: 1) Award's, 2) Chapter Officer's and has maintained this information since Clarke originally made these available. The current document consolidates the information and tries to expand upon the Chapter's beginnings. Hence, the *St. Louis Chapter* history has begun.

St. Louis Chapter was officially chartered March 7, 1947 by MSPE Board action. Prior to that date much work had been done by St. Louis engineering leaders toward forming the local chapter. A supportive petition dated November 22, 1946 and signed by 105 MSPE members in the St. Louis area had been presented to the State Board by A.H. Baum, Jr., PE. The petition carried the following heading and signatures of these persons:

A Resolution accompanied the above petition and signatures suggesting that the MSPE Board consider a procedure whereby outlying counties could have representation on chapter boards by electing a "County Representative". This suggestion was considered by the Society board and tabled.

The original St. Louis Chapter Area established by Chapter and State Society board action in 1947 included: St. Louis City and four Missouri counties (St. Louis, St. Charles, Warren, and Jefferson). The current St. Louis Chapter area is unchanged.

Substantial MSPE membership existed in the St. Louis area for about 10 years prior to the founding date of the Chapter in 1947. St. Louis leadership in the engineering profession enthusiastically supported registration of engineers as mandated by the State Registration Law enacted in 1941 by the Missouri General Assembly.

St. Louis Chapter members have met jointly over the years with the Engineers' Club of St. Louis and numerous major engineering organizations in St. Louis. Joint meetings held annually with these groups were a great benefit to the engineering profession and the general public. St. Louis was widely recognized as a major engineering center in the United States.

St. Louis engineering firms have designed numerous outstanding engineering achievements in the St. Louis area and elsewhere in the nation, and, in many foreign countries. Many of these have received national and worldwide recognition.

The St. Louis Chapter Auxiliary is outstanding. In 1986 this ladies' group was highly honored for its accomplishments by being selected by NSPE as the Champion Auxiliary in the nation. Also, the group was named Regional Champion, an area consisting of: the Dakotas, Minnesota, Iowa, Nebraska, Kansas, and Missouri. The basis for this high ranking and recognition is the Auxiliary's many years of awarding substantial engineering scholarships to worthy college students, and, for the collection of all funds used for this purpose.

## SPECIAL DEDICATION

---

UNDAUNTED/REMARKABLE PERSEVERANCE, NOV 25, 1949 - JAN 15, 2012

As many of you know, Denis Fessler, P.E., and fellow member for MSPE for 40 years, had an accident in 1993 that left him completely paralyzed from the shoulders down. Having an extremely positive approach to life, he and his wife, Terri, continue to live in their home of many years in Ballwin, MO. Their son, Michael, is a Captain and B-1 pilot in the USAF, and daughter, Jennifer, will soon complete her Ph.D. at UMC in Animal Parasitology.

Denis values his engineering background because through it he has designed modifications to his electric wheelchair and home that allow him to be both independent and productive. His electric wheelchair, controlled by a joystick he operates with his chin and a specially equipped van allow him to be mobile, and actively participate in a number of volunteer organizations like MSPE, the Boy Scouts, and church groups. He designed a table that attaches to his wheelchair which holds an array of remote controls, a telephony, and a 16" long "stick" he holds in his mouth to operate the remotes, page through a stack of papers or pages in a book, or type on his computer. A special computer program allows him to dictate text through a microphone for writing assignments and e-mail. Without his engineering background to perceive what might be possible and acquire the means to do it, he definitely would not be as well off.

Of course, family and friends are invaluable – they are his arms and legs. A group of men from his church alternate performing driving duties and ladies from his church bring and feed him lunch when his wife is away at work. An attendant gets him out of bed into the wheelchair each morning and returns him to bed at night.

Having served as St. Louis Chapter President from 1990-1991 and chaired numerous committees at the Chapter, State, and National levels, Denis continues to be active with the MSPE PEI Awards Program and helps with communicating St. Louis upcoming Chapter activities to the membership. And he is proud of the initials after his name: P.E.

*The article is written by Past MSPE PEI Chair and friend of Denis's, Mark Brumbach, P.E., on Jan 29, 2010. The article also appeared in The Missouri Engineer.*

*Denis Fessler retired from Union Electric after his accident. He served as MSPE PEI Chair 1986-1988 and again 2010-2012.*
